Saskatchewan Food Processors Directory 1990

Foreword

The Saskatchewan Food Processors Directory 1990 is the initial product of the Saskatchewan Food Industry Network/Database program. The directory provides a listing of Saskatchewan food processors and their products and has been designed to assist the agri-food industry in promotion and development.

The program is a co-operative effort of Agriculture Canada, Industry Science and Technology Canada, Saskatchewan Agriculture and Food, Saskatchewan Economic Diversification and Trade, and Saskatchewan FOODTALK - Department of Applied Microbiology and Food Science, University of Saskatchewan.

The information contained in this directory was compiled by Saskatchewan Agriculture and Food through a mail-out questionnaire and telephone follow-up of food processors. Saskatchewan FOODTALK assisted with the survey by providing the list of food processors. Agriculture Canada assisted with the survey by funding the printing of the directory.

We trust that this directory will be of use to the food industry, agri-business, government and producers. We welcome suggestions for changes and improvements. If you have any comments or enquiries or if your firm would like to be included in the Saskatchewan Food Industry Network/Database please contact:

Explanatory Notes

This directory identifies the products manufactured in Saskatchewan by the major industrial groupings identified in the Statistics Canada 1980 Standard Industrial Classification (S.I.C.).

For identification purposes, processors are noted mfr. (manufacturers) or rtl. (retailers) depending upon the firm's primary activity or output.

Firms that ship to other provinces or to other countries are identified as exporters (E).
